

RESILIENCE WEEK™

Transforming the resilience of critical infrastructure systems and communities across sectors

November 28-30, 2023 | Washington, DC | www.ResilienceWeek.com

Resilience Week is a symposium dedicated to advancing interdisciplinary dialog on policy and technologies that accelerate critical infrastructure and community resilience to unexpected and malicious threats.

7
April

Call for Special Sessions

Submissions will be reviewed with a preference towards:

- New interdisciplinary approaches or perspectives
- Applications-focused work with clear industry relevance
- Interactive sessions

1
MAY

Call for Papers (No Extension)

Papers* will be reviewed with a preference towards:

- New interdisciplinary approaches or perspectives
- Clear alignment with focus and topical areas
- Papers will be submitted to IEEE for publication in Xplore.

** Work-in-progress papers (WIPP) may also be submitted and should describe research that has not yet produced the results but that due to its novelty and potential impact deserves to be shared with the community at an early stage. Authors need to identify the paper as a WIPP in the title of the submitted manuscript.*

FOCUS AREAS

The Critical
Infrastructure
Threat Landscape

Understanding Critical
Infrastructure Systems and
Interdependencies

Building Critical
Infrastructure Resilience
Through DERs

Energy Equity and
Community Resilience

Cyber Resilience
for Operational Technology

Commercializing R&D
for Resilience

PAPER TOPICAL AREAS

Control
Systems

Cyber
Systems

Cognitive
Systems

Communication
Systems

Communities &
Infrastructure
